## Inspector Observations:

This is a follow up due to a facility closure on 5/28/19 due to a cockroach infestation and a complaint received on 5/22/19 (CO0069161). The facility contacted Integrity Pest Control Services and had the facility serviced on 5/28/19. Operator will continue to receive pest control services every two weeks. Pest control paperwork verified. No live cockroaches were found at this time. The broken tile below the steam table was repaired. Cracks and crevices at the cook line have been sealed.

-Observed dead cockroaches on the floor drain below the steam table, on the flat grill, on the top shelf where the condiments are stored over the prep area, on the floor near the water heater. Discard dead vermin. Clean and sanitize all affected areas.  
 -Observed broken cove base tile underneath the syrup boxes. Replace broken tile and eliminate cracks and crevices.  
 Continue to clean and sanitize the facility, especially the floors and equipment. Continue to regROUT the floors where needed.  
 Ensure pest control services are obtained as often as necessary.  
 The facility has been reopened and "A" card reposted.
